## FOREWORD

*Wrought Iron in its various forms needs no introduction to Canadian people. That beauty in iron work is undergoing a present day revival, that has never been surpassed by the best in past ages, can readily be discerned by the most casual study of current magazines devoted to the Arts of Decoration and Architecture.*

*Wrought Iron, uniting delicacy of form to rugged grace, is the most used of all decorative materials. It can be artistically hammered to form a hundred useful articles, all of which must possess the inherent simplicity and charm of the material of which they are made.*

*This ability to work at will with the material makes standardization impossible, and we illustrate only a few of the many articles we make and sell. A special designing department is always at the disposal of our customers and an inquiry will bring immediate service.*

*No illustration can properly capture the beauty of the finished article in iron, and we issue an invitation to all our prospective customers to visit our shop at any time, where most of the articles catalogued are on display.*

## *GENERAL INSTRUCTIONS FOR ORDERING.*

### *TERMS*

*All orders must be accompanied by a remittance covering the cost of the goods. We are always pleased to open accounts upon receipt of references. If cash is remitted in a letter, we will not be responsible for the receipt of such money, unless letter is registered.*

### *EXCHANGE*

*We accept for exchange, credit or refund, any unsatisfactory article which is returned within three days of delivery, and therefore goods are not shipped subject to approval. In special order work we reserve the right to refuse return of any articles which have been made from full size details approved by the customer before the work has been started.*

### *TRANSPORTATION CHARGES*

*Owing to our very reasonable prices, we do not pay transportation charges on goods, unless so specified. If you wish goods shipped "Prepaid" include a sufficient amount in your remittance. Goods are shipped by Freight, Express or Motor Transport at our discretion unless the means of transport are specified when ordering.*

*Delivery in Toronto, and any packing or crating required, is included in the price quoted.*

*When ordering always be sure to state the Catalogue Number.*

### *NOTE*

*All prices quoted are subject to change without notice.*

## INSTRUCTIONS FOR ORDERING FIREPLACE WORK

1. In ordering sets of fireplace work it is always necessary to send a diagram of the fireplace. The following measurements should be noted on the diagram:

- (A) Depth of fireplace from face to the back wall.
- (B) Width of fireplace at rear.
- (C) Width of opening.
- (D) Height of opening.

Any fireplace having unusual features, such as built up floors or built in hobs, all measurements of such features are necessary.

2. Screens are usually made half an inch larger than the opening and fit tight against the face of the fireplace. When screens are shapes other than rectangular, a paper pattern of the exact size of the screen must accompany the order. Screens are made any size without extra charge.

3. Andirons are designed with back bars to fit fireplaces of any width, but only 18 inches deep. If the fireplace varies greatly in depth from this, andiron back bars will be suitably altered without extra charge, providing proper instructions are given with the order.

4. Curbs are made any size. Send the dimensions of the outside of the curb you wish made. It is well to note whether the hearth is flush with the floor of the room. For fireplace seats all dimensions of the outside of the fireplace are necessary. All fireplace seats are supplied with brown leather covering. If desired, the leather can be supplied, without additional charge, in any of the standard colours. A colour sample should be sent with the order, and we will forward a sample of the nearest stock colour in leather, for approval.

5. All iron, unless otherwise specified, is supplied in Armour Bright Finish. This finish shows the hammer marks and natural irregularities of the material and lends a quaint charm to the finished article. Special finishes, such as dull black, or plated work in brass, bronze or antique brass or bronze, can be supplied whenever necessary. Prices for this work may be obtained upon request.

6. Any of the articles illustrated may be supplied any size, usually without alteration in price, but unless instructions are given with order they will be supplied the size specified.

## TO KEEP WROUGHT IRON

The Armour Bright Finish of wrought iron work is subject to rusting if not properly cared for. Before leaving our shop every article is lacquered and waxed. Once or twice a year the iron should be gone over, using ordinary floor wax. In cases where articles have rusted, the rust should be first removed with sandpaper before waxing.

Hand wrought iron is one of the most indestructible of all decorative materials, and no material will retain its original finish and charm so long with as little attention.

# *Gift Suggestions in Wrought Iron Work*

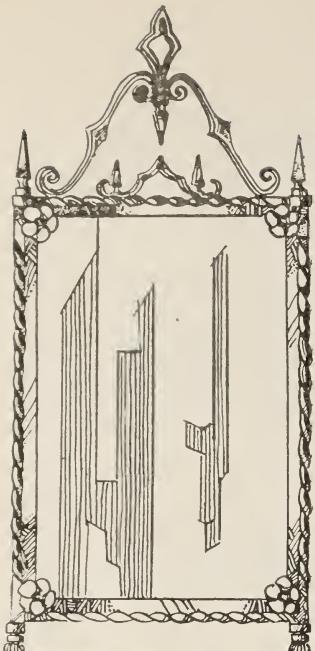

*by  
Metalsmiths Co. Ltd.  
903 Yonge Street  
Toronto*

*To aid you in your search for suitable Wedding Presents or other Gifts, Metalsmiths Company Limited draw your attention to their handiwork. Hand Wrought Iron uniquely combines utility with beauty, and provides remarkable opportunities to those who pride themselves upon giving useful but unusual gifts.*

*It is impossible to impart the grace and charm of Hand Wrought Iron Work by means of illustrations, and we therefore invite prospective customers to visit our shop, where most of the articles illustrated may be seen.*

*Our special designing department is always prepared to submit designs and prices for articles not carried in stock.*

*Fireplace Work, which is not illustrated in this folder, contains particularly useful gifts, which are seldom given, but always appreciated. A special catalogue of Fireplace Work may be obtained upon request.*

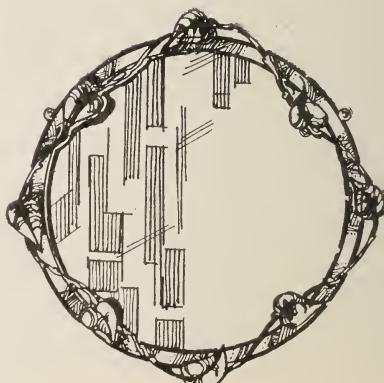

*All prices include mirror franties  
and best 1/4" plate mirror glass.*
